Professional Summary

Experienced IT professional with 8+ years of expertise in managing complex IT infrastructures, cloud platforms, and DevOps practices. Proven track record in leading cloud migration projects, implementing Infrastructure as Code (IaC) using Terraform, and optimizing system performance through automation. Adept in virtualization, system security, and scripting with PowerShell and Bash. Passionate about leveraging Azure and modern DevOps tools to deliver secure, scalable solutions.

Professional Experience

Blackboard Technologies Pvt Ltd, Chennai

Senior IT Systems Engineer | 05/2021 – Present

- Architected Hybrid Cloud environments (Azure, VMware, Hyper-V) and led migrations of on-prem workloads to Azure VMs with high availability.
- Standardized Infrastructure as Code (IaC) via Terraform to automate provisioning of Azure resources, reducing errors, and improving deployment speed.
- Built GitHub Workflows for CI/CD, automating resource deployment and fostering team collaboration.
- Deployed and Scaled Azure Virtual Desktop (AVD), managing host pools and session hosts for global users.
- Administered Azure Entra ID for multi-tenant environments, securing identities through Conditional Access Policies, PIM and MFA.
- Streamlined SSO Integrations and App Registrations, enabling secure, seamless authentication for third-party and internal enterprise applications.
- Directed Intune Endpoint Management, overseeing application provisioning and security configuration profiles for a mobile and remote workforce.
- Automated patch management using SCCM and integrated reporting to maintain compliance and reduce vulnerabilities.
- Mentored a 5-member IT team, leading technical knowledge sessions and conducting infrastructure audits to optimize cloud spending.

Fourth Dimension Technologies Pvt Ltd, Chennai

Systems Administrator | 03/2019 – 05/2021

- Delivered end-to-end support for Microsoft 365, including mailbox migrations, Teams administration, and license management.
- Administered Azure and Intune MDM, configuring device compliance policies and securing remote endpoints.
- Managed VMware infrastructure, performing VM provisioning, patching, and maintenance.
- Automated routine tasks using PowerShell, streamlining user account management and system reporting.
- Collaborated with teams to implement GPOs, endpoint hardening, and internal IT audits.

Accel Frontline Pvt Ltd, Chennai

RD Engineer | 08/2018 – 01/2019

- Supported Microsoft 365, on-prem Active Directory, and Azure AD environments.
- Handled L1 and L2 support tickets, ensuring timely resolution of technical issues.
- Performed Windows Server patching and routine maintenance.

Kal Cables Pvt Ltd, Chennai

Technical Support Engineer | 09/2016 – 10/2017

- Monitored server and application performance to maintain high availability.
- Provided technical support for user accounts, hardware, and system issues.

Key Projects

Terraform Infrastructure Automation – Azure Cloud

Developed reusable Terraform modules to automate the deployment and destruction of Azure infrastructure components. Implemented data resource blocks to reference existing Azure resources, lifecycle prevent_destroy policies to safeguard critical infrastructure, and dynamic backend state configuration for modular reusability. Integrated version control via GitHub and established CI/CD pipelines using GitHub Workflow for streamlined and auditable deployments.

Cloud Migration Using Azure Migrate

Spearheaded the migration of 250+ on-premises Hyper-V VMs to Azure using the Azure Migrate tool. Managed end-to-end migration planning, workload assessment, network configuration, and post-migration validation to ensure optimal performance and cost efficiency.

Server Separation During Company Divestiture

Led a large-scale server separation initiative during corporate divestiture. Migrated over 200+ virtual machines across Hyper-V environments and transitioned them to a new domain with minimal downtime. Oversaw planning, execution, and validation phases ensuring business continuity and compliance with security standards.

Endpoint Migration and Automation During Company Merger

Led endpoint migration across 400+ devices during a corporate merger. Designed and deployed Windows Autopilot profiles on the new tenant, automated Hardware ID (HWID) uploaded, and developed PowerShell scripts to offboard devices from on-prem Active Directory and rejoin them to the new Entra ID tenant. Streamlined app uninstallations and compliance configurations to accelerate migration timelines.

Skills

- IT Project Management | Windows Server Administration | Azure Administrator
- Azure DevOps | Terraform | Docker | GitHub Version Control | GitHub Actions
- Intune | Azure Entra | Microsoft 365 | Backup | Policies
- PowerShell | Bash | YAML | JSON | ARM

Certifications

- AZ-104 – Azure Administrator Associate
- MS-100 – Microsoft 365 Identity and Services
- MS-101 – Microsoft 365 Mobility and Security
- AZ-900 – Azure Fundamentals

Education

DMI College of Engineering – BE, Electronics and Communication Engineering | 06/2012 – 04/2016
